

AIR QUALITY (AQ) MONITORING

The High Lane Village Neighbourhood Forum supports the plan for AQ monitoring data equipment to be used to provide evidence of the current air pollution risks in High Lane village area from the A6 traffic.

The awarding of our funding is based on very strict guidelines, where we have to specifically list how the money being applied for will be spent. Unfortunately, when we applied back in April last year, an AQ report was not on our list. At the end of each financial year we have to complete a grant report which provides details of exactly how the money has been spent. We therefore, have to be very careful that we have stuck to our original application. It is due to these funding constraints, that the Forum cannot use our grant money for this consultant service.

However, the HLVNF does support the AQ plan with our members contributing as individuals to the AQ fund. We would then like to use this community funded data for the Neighbourhood Plan as well as the GMSF response for everyone's benefit.

This really is a worthwhile effort but every penny is needed, please do contribute if you can!?
